# Microsoft 70-347: Enabling Office 365 Services

## Structured technical training and certification preparation

A practical, student-friendly outline covering technology Review, device Management, office 365 Deployment Plan, windows Azure, and powerShell.

**MODULES**
**8**

**LESSONS**
**68**

**FORMAT**
Self-paced

## Module Breakdown

**MODULE 1**

### Technology Review
Introduction
Active Directory Install And Configure
PowerShell Primer
Microsoft Exchange Server Install And Configure - Part 1
Microsoft Exchange Server Install And Configure - Part 2
Review Cloud Computing - Part 1
Review Cloud Computing - Part 2
Review Virtualization And The Cloud - Part 1
Review Virtualization And The Cloud - Part 2
Review Virtualization And The Cloud - Part 3

**MODULE 2**

### Device Management
Client Devices
Demo Client Device Setup - Part 1
Demo Client Device Setup - Part 2
Office 365 Client Deployment
Office 365 Components
Office 365 Deployment Methods
Office 365 Cloud Deployment Methods
Office 365 Deployment Prerequisites
Office 365 Deployment Readiness
Office 365 Deployment Network Environment

**MODULE 3**

### Office 365 Deployment Plan
Network Planning
Internet Network Usage Planning
Network Device Planning
Account Management Planning - Part 1
Account Management Planning - Part 2
Migration And Coexistence Options
Single Sign On Architecture
Demo Server 2012 Core With Active Directory Role

**MODULE 4**

### Windows Azure
SharePoint 2013 Using Windows Azure - Part 1
SharePoint 2013 Using Windows Azure - Part 2
SharePoint 2013 Capabilities

# Module Breakdown (continued)

## MODULE 5

### PowerShell
Scripting And PowerShell - Part 1
Scripting And PowerShell - Part 2
PowerShell Scripting Techniques - Part 1
PowerShell Scripting Techniques - Part 2
Enterprise Ready Scripts - Part 1
Enterprise Ready Scripts - Part 2
PowerShell Scripting Syntax - Part 1
PowerShell Scripting Syntax - Part 2
PowerShell Scripting Active Directory - Part 1
PowerShell Scripting Active Directory - Part 2
PowerShell Remoting
PowerShell Adding Bulk Users In AD

## MODULE 6

### SQL Server
Introduction To SQL Queries
SQL Queries - Part 1
SQL Queries - Part 2
DML And DDL - Part 1
DML And DDL - Part 2
DDL
SQL Server And PowerShell
SQL Server PowerShell And AD
Logging Data In SQL Server Using PowerShell

## MODULE 7

### Azure Lync and SharePoint
Azure Active Directory Fundamentals - Part 1
Azure Active Directory Fundamentals - Part 2
Deploying Lync Server - Part 1
Deploying Lync Server - Part 2
Deploying Lync Server - Part 3
SharePoint Designer
Backup And Restore Share Point
Windows PowerShell And SharePoint
Identity Service With Active Directory
Setup And Deploy Exchange

## MODULE 8

### Course Review
Review Virtualization
Review Cloud
Review Automation Using PowerShell
Review Desktop Applications
Move To Office 365
Conclusion
